

## ANN WAIRIMU

Ann is 12 years old and in 6<sup>th</sup> grade. She was born in 7/10/1997. She lives with her biological parents who are HIV positive. However, Ann is lucky to be HIV negative.

They live in a two roomed house with no electricity and use a kerosene lamp during the night. They use a pit latrine and tap water which is within the compound.

The home compound is not noisy and there is some security since the gate is closed during the night.

They use charcoal jiko or kerosene stove for cooking. She takes two meals per day which is not always balanced diet and shares the bed with her sister. She does not have any major health problems except for the normal illness like irregular cough and headache which comes and goes.

Her best subjects are English and Kiswahili. Besides her schooling, her hobbies are swimming, rope skipping, and Kati/hide and seek. She scored 298 out of 500 marks and promises to work hard in school. She would like to become a secretary when she grows up.
