

Meshack Nyabuto

Meshack is nine years old and in third grade. He was born on August 15th, 2002. Both his parents are HIV positive, however he is HIV negative.

He lives with his parents, two sisters and one brother. They all live in a one roomed house without electricity and use a charcoal jiko for cooking. He takes three meals per day which is rarely balanced in terms of diet and shares the bed with his brother. He uses borehole (well) water and a pit latrine which is within the compound but shared among the people within the same compound.

The neighborhood environment is noisy since it's near the main road and there is no security. He is a talkative and a friendly boy and likes helping in family chores like washing dishes. His favorite activities are playing soccer, tennis and riding bicycle. He scored 383 marks out of 500 and promises to aim for higher marks. His dream is to become a doctor when he grows up.
