

Neema Adam

Neema is eight years old and in second grade. She was born on 28/08/2002. Both her parents died of HIV/AIDS; however Neema is luckily HIV negative.

She lives with her grandmother who is HIV positive and also a widow, three cousins and one brother. They live in a one roomed house without electricity and use charcoal jiko for cooking.

She is a disciplined and kind girl and her favorite activities are playing Kati and skipping rope. Neema eats two meals per day. She shares the bed with her grandmother and cousin. They buy borehole (well) water and use a pit latrine which is shared among the people within the same compound. The compound is noisy and there is no security.

She scored 420 marks out of 500 marks in her last exam. Her dream is to become a pilot when she grows up.
